

## Sharing History

### Florida Energy Company New Office Center

In 2023, this Florida energy company completed its 1,000-employee office center in Palm Beach Gardens, Florida.

Bluewater Studio was selected to work with the Perkins&Will Branded Environments team to provide a stunning Timeline Art Gallery, located in the lobby of this state-of-the-art facility. Complementing the lobby architecture, the rich history and growth of the company are presented with scale and elegance.

To enhance the visual depth and beauty of the Timeline imagery, Bluewater Studio printed historical and current images on the back surface of large glass panels, sealed with an epoxy coating. Anodized aluminum trim frames each panel, resulting in an illusion that the images are floating.

The significant size and weight of each panel dictated certain fabrication steps, including a custom-fabricated panel adhered to the back of the glass, and a full-scale prototype to test the printing and fabrication methodology.

We are pleased to be a selected partner, helping this energy company to beautifully share its rich history and story.

***"Thank you for the fantastic artwork – it is magnificent, and we have already received numerous compliments. Your attention to detail is wonderful!"***
