 STUDIO**

ENVIRONMENTS + EXHIBITIONS

Bluewater Studio led the Planning, Design, Fabrication and Installation of an interactive exhibit in a specially outfitted railcar that travels the country with the elite Union Pacific Heritage Fleet.

“Experience the Union Pacific” is a traveling, multi-media exhibition that highlights the railroad’s history of innovation while engaging visitors in present and future of the railroad. Through historic imagery, large-scale graphics, and interactive technology, guests explore the evolution of locomotives, the role of trains in transporting goods, modern railway technology, and more.

Focused on the spirit and history of innovation at Union Pacific, the exhibition provides visitors with opportunities to understand the integrated role of the railroad in our everyday lives. Interactive elements like simulations of railcar inspections and hands-on engagement with thermal tiles, deepen the experience for visitors.

The exhibition has traveled across the country and welcomed hundreds of thousands of visitors since its debut.
